US-CL-CURRENT: 361/328

ABSTRACT:

PURPOSE: To prevent influence of outside air and reduce variation of the capacitance, by forming an outside plate whose section is a ring, installing a first electrode on the inner surface of an inside plate of a hollow semicircle cylinder body formed by the inside plate, and installing a second electrode on the inner surface of the outside plate.

CONSTITUTION: An outside plate whose section is a ring is formed. A first electrode 6 is temporarily fixed on the inner surface of an inside plate of a
